

What do silver investors know that you don't?

...8 Reasons why silver is a better investment than gold!

READ DETAILS BELOW ↴

Dear Investor,

You don't need me to tell you that commodities are booming, and that gold has been in a bull market for the last 3-5 years! Selenium and Molybdenum are up 1000%, that's up over 10 fold. Oil is up to \$46/barrel from a low of about \$10! But do you know which commodity stands to outperform them all? In 2003, every mining and exploration stock for this commodity was up, on average, 314%! It wasn't gold! It was silver!

Silver's up a buck in the last week! Silver, at \$7.50/oz. is up a mild 80% since about 2 years ago at \$4.15/oz. That's just the start, but it sure beats bonds and real estate! **What do silver investors know that you don't?**

Here's a few reasons why silver will continue to outperform gold.

1. The historic silver/gold price ratio was 15 or 10:1. Meaning, it took 10 ounces of silver to buy one ounce of gold. In recent years, silver was relatively cheaper ranging from about 40:1 to 80:1. On Feb. 22, with silver at \$7.52/oz. and gold at \$435/oz., the ratio is 58:1. This means that silver is currently undervalued, and cheaper than historic norms, and thus it is a better investment than even gold if you want to "buy low and sell high".
2. The supply and demand fundamentals for silver are extraordinary. More silver is consumed by industry each year than is produced by mining and recycling combined. Some say this deficit reaches back 60 years, and has consumed virtually all the known silver ever mined since the beginning of the world. The annual deficit has recently ranged from 100 million to 200 million ounces per year. Annual supply is about 600 million ounces, and annual demand is about 900 million ounces.
3. Considering refined, above ground, known silver reserves, there is far less silver in the world than gold. About 150 million ounces of silver vs. 4000 million ounces of gold.

For six more reasons why silver will outperform gold, and all other commodities, read my e-book after you sign up to my free email list. Sign up to my email list here: [Silver Stock Report Sign up Click Here!](#)

Why is my email list important? ...I'm glad you asked.

My silver stock report covers about 80 silver stocks.

Why silver stocks? Because many silver stocks will outperform even silver! Remember, silver stocks were up 314% on average in 2003, and will probably outperform that in 2005-2006!

My **FREE silver stock report** contains company profile summaries, the share price, the market cap, the web link, telephone numbers, email addresses, and a comparative valuation based on the price you pay for the silver that the companies say they may have in the ground. This report is about 100 pages long when printed out, and would easily be a \$150 value if it were a book! But it's better than a book, because with the web, I can update it about once a week!!!

If you are thinking about investing in silver stocks, you must read the Silver Stock Report! There is no other source in the world with such a comprehensive report on silver stocks.

How can I produce this report for FREE? Good question! I'm a work-a-holic and a multi-millionaire, and I'm already invested in many of these stocks. In fact, I own shares in about 30 of them. So, I will continue to make great money. (My money is where my mouth is.)
